

## TORNADO - AUTOMATIC STEAM CLEANING & SANITIZING FOR MODULAR BELTS

1. Steam generator, 9, 18 or 36kw, no detergent
2. Digital control panel (mobile)
3. Tornado rotary steam nozzle - No limit in belt size
4. Electrical enclosure (mobile)

Cleaning width with 9kw generator: 15cm

Cleaning width with 18kw generator: 25cm

Cleaning width with 36kw generator: 35cm

The steam nozzle moves left to right according to the programming, and covers the entire width of the belt. The number of movements and the duration for each position is programmable, according to the quantity and type of contamination and the width of the belt.

- Very easy, tool height regulation / move from one belt to another in less than 2 minutes
- Waste water is collected in a container
- Intuitive, user friendly touch screen control panel
